I believe the US Government has expended large sums of money in a wasteful manner chasing Microsoft in what is obviously a competitor induced legal travesty - not even considering the new AOL suit (just jumping on the bandwagon). Everyone concerned should be interested in accepting the pending settlement, telling the other states AGs to "do something worthwhile and forget Microsoft" and allow the DoJ to concentrate on things that really matter, like anthrax, terrorist, airline and infrastructure safety.

I really doubt that anything Microsoft might do could compare to the 9/11 attacks, so please put your emphasis where it will do some good for citizens, not Oracle, Sun Microsystems, and AOL.

Thank you.

Regards,
Paul A. Kittle
